FORMS AND SAMPLE WARRANTIES

Warranties

VP Buildings provides quality services and products to Builders by strictly adhering to prescribed engineering and manufacturing procedures. Because of strict quality control, VP is confident that the products you receive will perform, and will provide your customer with years of reliable service. We stand behind our products by offering the most comprehensive warranty program available. To view all the Warranties go to the Builder website and click on the Warranty Tab.

GENERAL INFORMATION:

A full range of warranties is available to satisfy the most discriminating owner. As shown in the Warranty Summary, the standard VP warranty provides owners with a basic protection plan on materials and workmanship for a three-year period. In addition, VP panel finishes are warranted for ten or twenty years, depending upon finish and panel application.

Owners who would like the security of having an extended warranty have various warranty options available. These options address any concerns an owner could have. For those owners whose concern centers on weather-tightness, VP offers an Extended Weather-tightness Warranty which covers our SSR and SLR systems for 20 years. In essence, VP offers a warranty program to suit everyone.

For further information and sample warranty specimens, refer to the Warranty section of your Product manual.

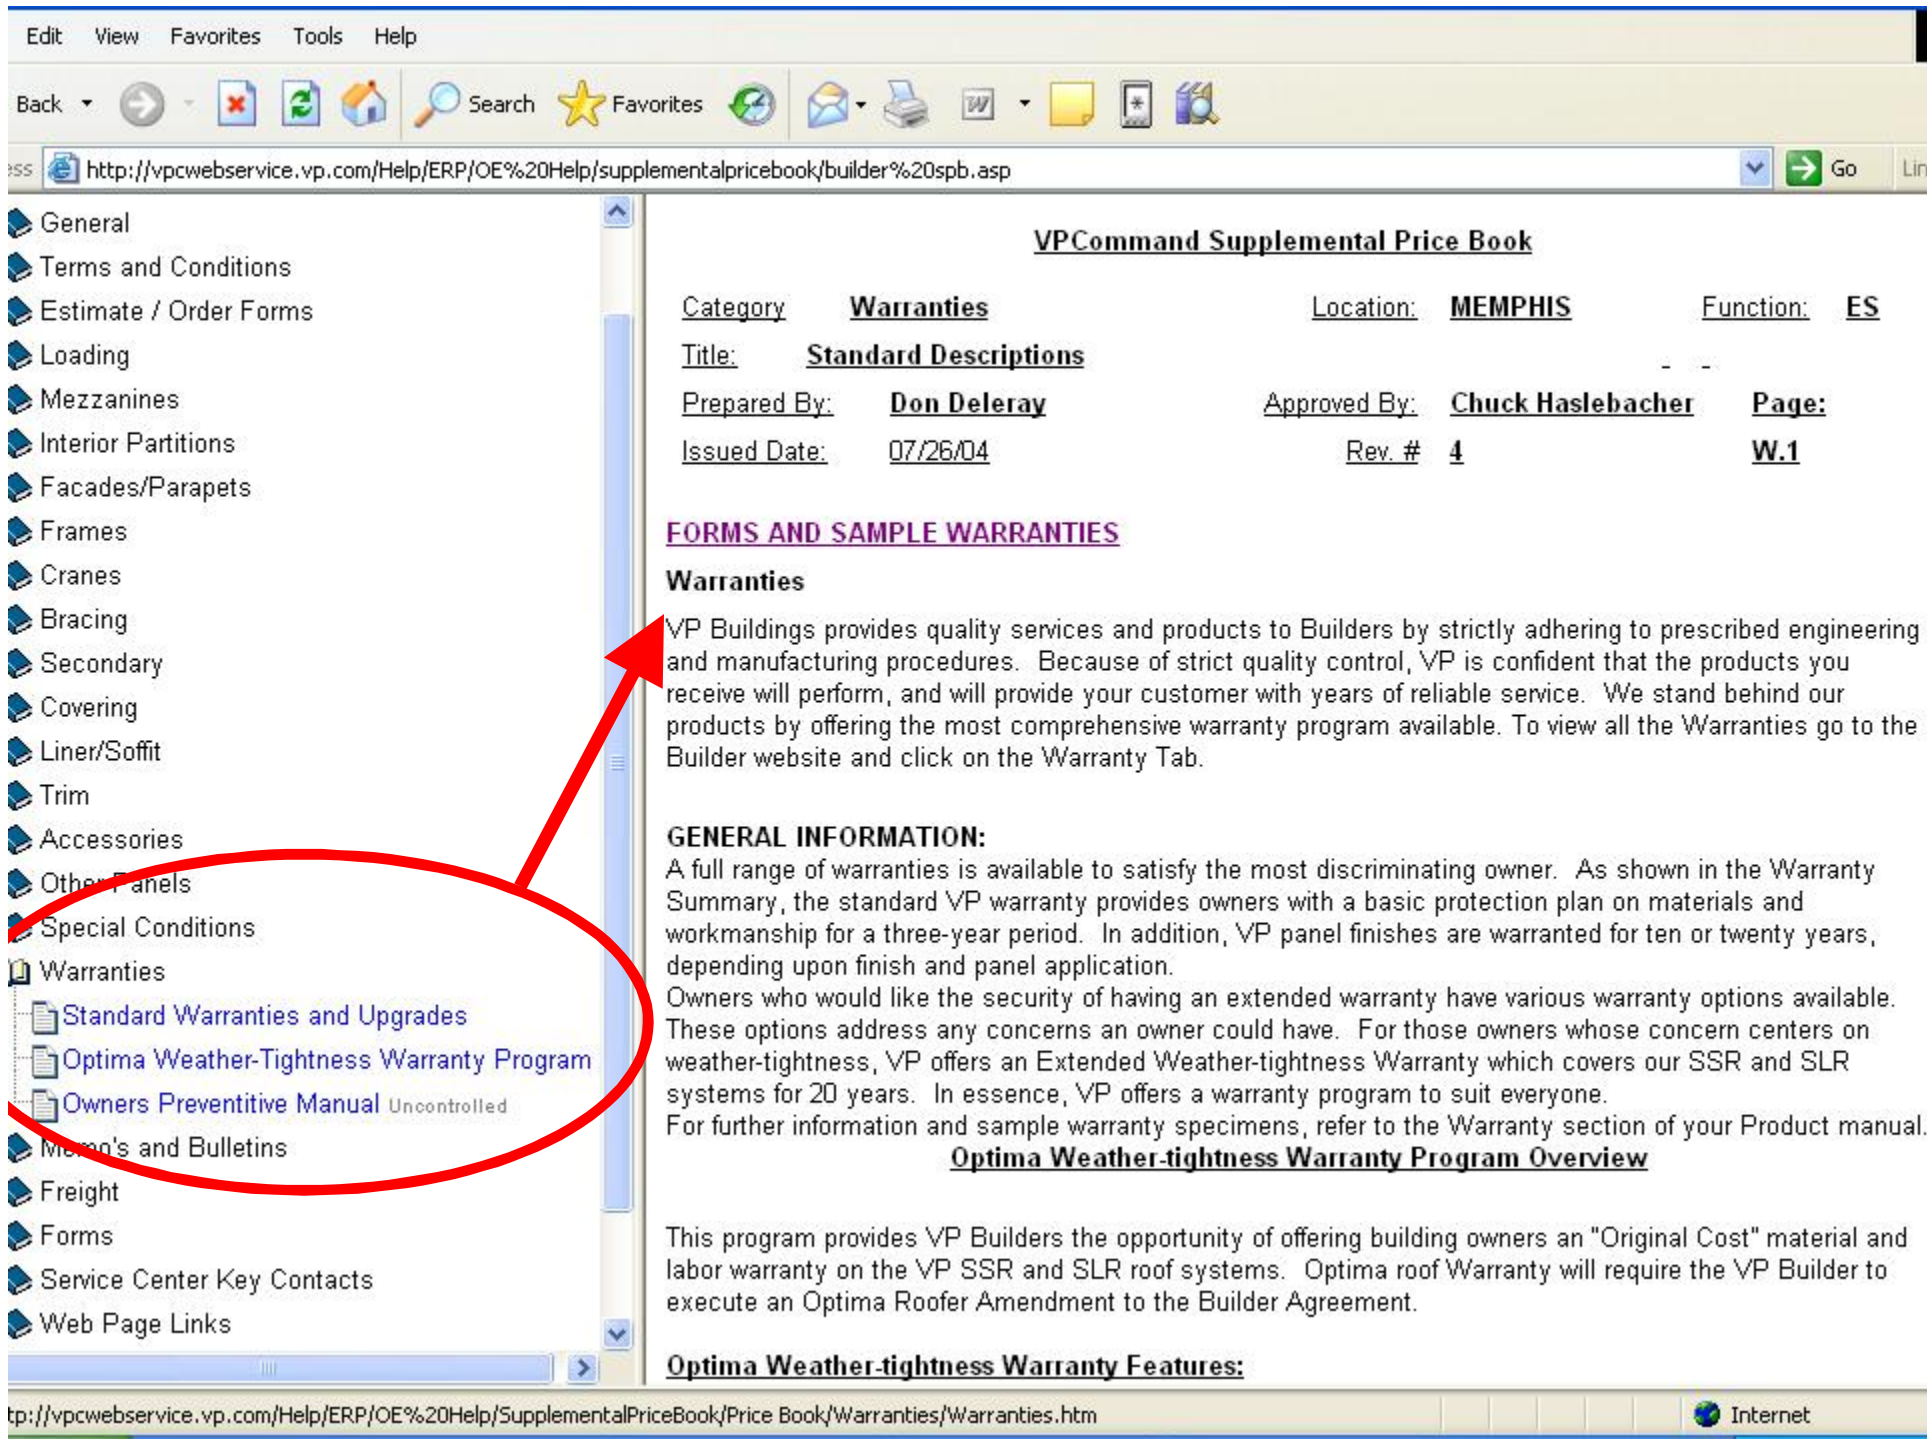

Optima Weather-tightness Warranty Program Overview

This program provides VP Builders the opportunity of offering building owners an "Original Cost" material and labor warranty on the VP SSR and SLR roof systems. Optima roof Warranty will require the VP Builder to execute an Optima Roofer Amendment to the Builder Agreement.
