

VPCOMMAND Tip 53 – VPCOMMAND Accessories

Adding VPCOMMAND accessories is a simple yet important process in completing your VP project. Make sure you carefully consider each field to ensure you receive what you need.

Inserting Building Accessories

	<ol style="list-style-type: none"> From the Tree, double-click the Accessory folder to open the Accessory window.
	<ol style="list-style-type: none"> At the Field Located Accessories tab, click on Wall or Roof to allow the proper tables to be displayed. Continue your input right-to-left as you would read a book. Click the Insert button to add the items to your list.
	<ol style="list-style-type: none"> Continue this process until you have all the desired accessories.
	<ol style="list-style-type: none"> Click OK when input is complete.

Your Accessory items will display near the end of the Pricing Report.
