VPC-TIP
October 6, 2003
Working with Multiple Shapes

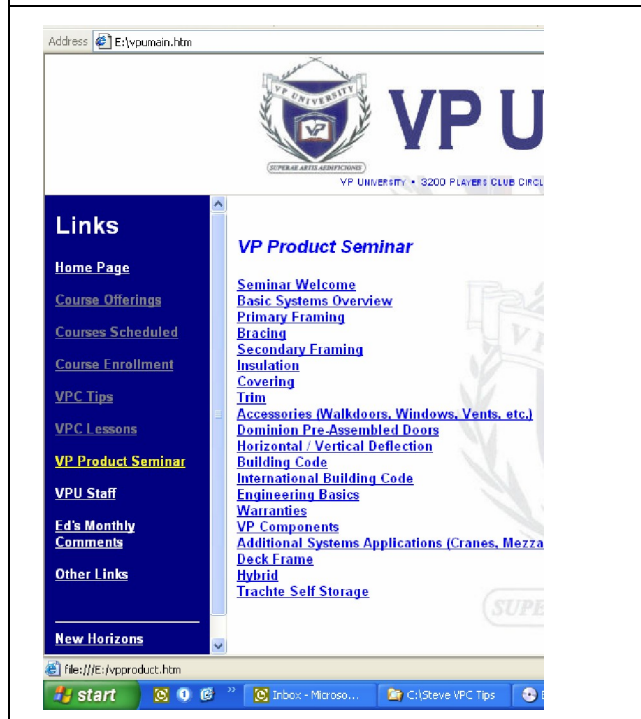

When working with more than one VPC Command Shape, there are a few things to remember to make this easier:

- The first shape you open will become the base shape from which all other shapes are referenced. The first shape's origin will be calculated by the "0,0" axis shown on the graphics pane.

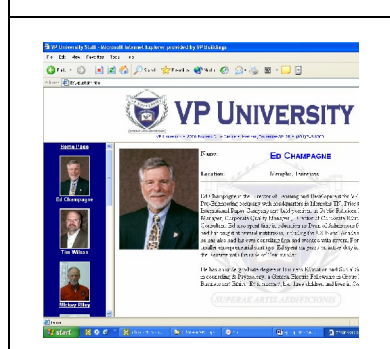

VPC Tips: Provides you access to all past and future VP Command Tips.

VPC Lessons: Provides you access to all VP Command training lessons.

VP Product Seminar: Provides you access to the PowerPoint slides used in VP's Product Training seminar.

VPU Staff: Grants you a glimpse into the lives of the people who make up VP University.
